

## Week 2: Project and Portfolio

1. All files are archived to Github, I feel like this week was a bit easier after seeing the process of last week. [https://github.com/mirandajlee/lee\\_miranda\\_portfolio](https://github.com/mirandajlee/lee_miranda_portfolio)
2. This week went okay for me, I have to say that I wish I would have felt more concentrated. I had a hard time keeping up on deadlines and finishing before my liking, but I was able to finish. I did not get caught up in the Career Module this week. I did appreciate all of the peer feedback that I had on my failure to success discussion. I feel like my overall estimations in my worksheet have been over estimated, which I think is better then under, but it does make me realize that I am faster at doing my work then I originally think.
3. I did not commit the time and effort that I have wanted this week. I plan to do better next week. This week I had days that I just was not in the place for school, and I need to force myself to sit down and concentrate on school even when I am in that place.
