Week in Review

1. **Github**: When first looking at Github it seemed very foreign, but after a bit more research and experience it made more since. I set up my file structure and feel prepared to add files to the Git. https://github.com/mirandajlee/lee_miranda_porfolio

2. **Week in Review**: I feel confident finishing out the first week. I really appreciate the positive outlook instilled into this course. I had some great first interactions with peers and feel like the course is well organized. I spent the most time with the development assignment, but after gaining some understanding it was quite simple. I am pleased with my feedback and grades of the first week, I plan to continue getting things done early in the week so that it doesn't all pile up by the end of the week.

3. **Reflect and connect**: I feel that I gained knowledge this week with the Git. I felt as first very overwhelmed and I had very little understanding of the concept. After research, I found it quite simple and look forward to gaining more knowledge on the subject. I feel that Github will contribute to my career greatly.
